DETAILED ACTION

1. Applicant's arguments filed 2/17/2004 have been fully considered but they are not persuasive. Applicant's argument that Gurich does not disclose a bellows solidly attached to the actuator bore is not considered persuasive due to the fact that the bellows (18) is solidly connected to the actuator bore (containing element 21) via the bellows extension (26) and the bellows (18) is solidly connected (fig. 2) to a head of the piezoelectric actuator (17). Regarding Applicant's argument that the actuator bore is not element 21, the actuator bore is unnumbered and the bore contains element 21 and since a bore is defined as a hole, the leakage area 21 is considered as a part of the bore.

Information Disclosure Statement

2. The information disclosure statement filed 2/11/2004 is acknowledged by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 9, 10, 14, 13, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by German Pat. No. DE 19744235 A1 (Gurich et al.). Gurich et al. disclose a valve for controlling fluids having a piezoelectric actuator (17), an actuator bore (containing element 21), a hydraulic booster (20), a bellows (18) connected to the head (fig. 2) of the piezoelectric actuator (connected at 19) and the actuator bore (connected at 26), a sleeve-like extension (26), that is

Art Unit: 3754

solidly connected to the actuator bore via a press fit (fig. 2) of a retaining body (1), and the bellows (18) has three undulations (fig. 2).

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over German Pat. No. DE 19744235 A1 (Gurich et al.) in view of U.S. Pat. No. 3,651,657 (Bottum). Gurich et al. disclose the valve actuator descried above but lacks having the bellows seal being made of metal. Bottum teaches that a bellows may be made of either plastic or metal (col. 5, lines 2-4). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the valve actuator having a plastic bellows of Gurich et al. by replacing the plastic bellows with a metal bellows as taught by Bottum in order for the bellows seal resist being disintegrated by the internal fluid of the valve and for the bellows seal to be able to last longer within the valve.

Allowable Subject Matter

7. Claims 11, 12, 15, 16, 20, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/049,285

Art Unit: 3754

Conclusion

8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John K. Fristoe Jr. whose telephone number is (703) 308-1437. The examiner can normally be reached on Monday-Friday, 7: 00 a.m-4: 30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Louis G. Mancene can be reached on (703) 308-2696. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
